

Retrozone Inovative Products

www.retrozone.com

Do you have temperature comfort problems in your office building?

Does one person control the temperature and everyone has to go along?

Are you tired of calls from employees asking to change the temperature in their office?

The Retrozone SlaveZone will take care of these issues and more.

SD Series Damper featuring the Belimo LMB24 Actuator.

- Will operate directly with a thermostat and 24VAC transformer. No need for relay or control panel. This is a power open / power closed actuator, not a spring return. So the power is not always on in one of the positions (as a spring return would be in the power position). 5 year warranty!
- Damper is 24 gauge galvanized steel with bronze bushings and nylon spacers for longer life and easy, smooth movement, which means longer life.

RS 5110 Thermostat

- 5/2 day programmable thermostat with pop-up Wizard for easy programming.
- Large, digital display of temperature and settings.
- Easy to operate durable surface push button controls.
- Lock out on programming for personal controls (override provided for easy change-out)

24 Volt Transformer

- Will connect to 120VAC, 208VAC, 220VAC, 240VAC to convert to 24VAC

NOTE: RETROZONE WILL FULLY SUPPORT THIS SYSTEM WITH WIRING DIAGRAMS, TECHNICAL ASSISTANCE VIA TELEPHONE TO ASSURE THIS SET-UP WILL OPERATE PROPERLY.
